"pure vacuum, pure tone"

The Neale Amplifiers Harptone amps are inspired by Masco public address amplifiers from the late 1940's, to give you a pure microphone based amp, especially tailored for harp. This isn't a guitar amp you have to struggle with to find your harp tone, this amp is designed for microphones and is therefore perfect for harp.

Specification:

Channel One— high gain pentode with starved plate operation, for maximum crunch.

Channel Two— medium gain pentode, clean, loves a pedal.

Controls: Gain for each channel, Baxandall Bass and Treble, Master Volume.

Floating paraphrase (unbalanced) phase splitter for reduced feedback.

Valve rectifier: GZ34 = tight and punchy; 5Y3 = smooth and warm.

KT88/6550 80 watt head * \$1880

6L6GT/EL34 60 watt head * \$1770

6L6GT/EL34 45 watt head * \$1660

6L6GT/EL34 35 watt head or combo ** \$1550

6V6 20 watt head or combo ** \$1440

* match with 212, 310 or 410 speaker cabinet and add speaker costs.

** 112 or 210 combo, add speaker costs. We use Weber speakers.

(Photograph shows prototype with 1 x 12" and 2 x 8" Weber speakers)
