Delivery costs extra.  
(Offer only available in Australia)

# Harptone Valve Amps

... inspired by Masco Amplifiers

Model MA 35i

Inspired by MASCO public address amplifiers, the Neale Amplifiers Harptone valve amp offers a range of pure valve tones to complement your very own harp playing style.

- Channel One - high gain, maximum crunch (starved plate operation)
- Channel Two - medium gain, clean (loves a pedal)
- Bass and Treble controls, Gain for each channel, Master Volume (baxandall tone stack, just right for microphones)
- Floating paraphrase phase-splitter using 12AU7 or premium octal 6SN7 (un-balanced power stage, eliminates feedback)
- In-line valve rectifier - GZ34 = tight and punchy  
5Y3 = smooth and warm
- 35 watt cathode bias power amp with 6L6GT power tubes
- 6N8 pentodes for 1st gain stages, 12AX7 or premium quality octal 6SL7 for tone stack driver and 2nd gain stage
- Head and Cabinet fitted with Weber\* speakers  
(1 x 12" plus 1 x 8" or 1 x 15" plus 2 x 8" )

Photograph shows prototype (1 x 12" plus 2 x 8" speakers).  
Production models may differ according to customer requirements.  
\* or your choice of speaker (prices may vary).
